Product Overview

The Green Lion Rechargeable 4xAA + 4xAAA Battery Dock is a smart and efficient solution for keeping your batteries charged and stored in one convenient case. With a 1.5V output, it ensures that your AA and AAA batteries are powered up and ready for use whenever needed. The charging dock is designed with independent slot charging, meaning each battery can be charged individually without affecting the others. It includes essential features such as trickle charge protection, LED charging indicators for clear status monitoring, and a secure magnetic closure the device added safety and convenience. The built-in safeguards protect against overcharging and ensure the longevity of your batteries. This rechargeable dock offers the ability to recharge your batteries up to 1200 times, making it a sustainable and cost-effective choice for long-term battery use. Plus, the USB-C charging capability ensures fast and efficient charging, making it a versatile addition to your power solutions.

Specifications

Input	2A
Charger Output	5.0V
Charging Current	AA 350mA $\times$ 4, AAA 200mA $\times$ 4
Battery Output	1.5V
Charging Time	3.5 Hours (AA), 1.5 Hours (AAA)
Charging Port	USB-C

Schematic View

Package Contents

- 4*AA + 4*AAA Li-ion rechargeable batteries
- 1*1.5V Li-ion battery charger
- 1*Type-C cable

Product Features

- a.** Independent slot charger: Our charger can charge 4*AA and 4*AAA rechargeable batteries. It supports independent charging for each battery.

- b.** The charger is compatible only with 1.5V rechargeable Li-ion and AA/AAA batteries.
- c.** 350mA fast charging current for AA, and 200mA fast charging current for AAA batteries.
- d.** With an advanced MCU control system and intelligent voltage and current cut-off technology, the charger automatically switches to trickle charging to prevent the batteries from over-voltage, over-current, and overheating.
- e.** Automatic identification: The charger can automatically identify non-rechargeable batteries, short-circuit batteries, and defective rechargeable batteries through the microcomputer IC, and will not

Usage Guide

Plug in the power, the LED lights turn fully on, flashing Green and automatically turn off after 1 second. And then it will go into standby mode. Put in the rechargeable batteries, the LED light will show:

Charging	Red light
Fully charged	LED light static green
Incompatible battery	Red light flashing fast
Over temperature	Red light flashing fast

Warning: Do not charge when the LED light is flashing quickly, as it represents short, bad, or incompatible battery type.

Safety Precautions

- 1.** Install the batteries into the charger correctly by ensuring that the +/- pole of the battery matches the +/- pole of the charger.
- 2.** The charger can charge each battery independently.

3. The charger must be used at an operating temperature of 0 - 35°C.
4. A new battery will reach its best performance after 3–5 charge-discharge cycles.
5. Battery power may decrease due to long-term storage; please fully charge the battery before using it again.
6. Please cut off the power supply after the batteries are fully charged.
7. It is normal for the battery to become hot while charging. It will cool down to normal later; please feel free to use it.
8. DO NOT charge non-rechargeable batteries or other types of batteries. Doing so may cause battery leakage, battery explosion, personal injury, etc.
9. DO NOT charge batteries whose covers are damaged, as this may cause a short circuit and create a fire hazard.
10. Place this charger out of the reach of children. Children should use this charger under the supervision of adults.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
 - (1) This device may not cause harmful interference; and
 - (2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause

harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for assistance.

RF warning statement:

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction.

Disposal

This product must not be disposed of as unsorted household waste. It is important to separate such waste for proper treatment and recycling, in compliance with local waste management regulations.

Warranty

Products that you buy directly from our **Green Lion** website or shop come with a 24-month warranty.

When you buy **Green Lion** products from any of our approved sellers, you only get a 12-month warranty. If you want to extend this warranty, go to our website at **<https://www.greenlion.net/warranty>** and fill out the form with your information. Don't forget to upload a picture of the product too. After we've checked and accepted your request, we'll send you an email to confirm that your product's warranty has been extended.
